Jose,

We are still looking for the completion report for the well that URI drilled in 1989. I will get back to you on Monday.

Mark Pelizza

Subject: Garcia Hill Wells W-24 and W-25

Hello Mr. Mark:

It was a pleasure to see you last Tuesday, thank you for taking the time to come by and talk to us, and thank you for the provided log data. The information in the attached PPT file is intended to illustrate for you how we came to understand that the Garcia Hill wells W-24 and W-25 are located as shown on the map in Slide 3, that is, W-24 is the well to the North and West of the W-25 well.

Every piece of information related to Garcia Hill that I have reviewed so far addresses these two wells per the above described location distribution, whether it originated with the state, the citizens or EPA, or even URI. Therefore, I would appreciate it if you could consider taking a little time to review the attached file. I am afraid that any deviation from the above described well pattern will lead to questionable data interpretation. Please let me hear about what you may have found out regarding this matter.

I would also like to take this opportunity to ask if it might be possible for you to share with us a copy of the Completion Report for the water well that URI drilled at Garcia Hill on September 28, 1989. I am looking forward to seeing a document whose contents is similar to the info seen on Slide 4 of the attached PPT file.

Again, thank you for your time and effort. Have a great weekend,

José Eduardo Torres - 6WQ-SG
